The wise choice for technology solutions.

Welcome to SageNet

Specializing in

- + Network Solutions
- + Managed Services
- + Structured Cabling
- + Storage Solutions

SageNet specializes in the design, deployment, and management of mission-critical network infrastructure. Established in 1998 as an Internet service provider, we now focus on providing our customers with a full range of network-centric consulting, systems integration, and network management services.

Our expertise spans a wide spectrum of skill sets and technical competencies. Network design and installation, network management, multi-site network rollouts, PCI compliance support, nationwide break-fix maintenance services, structured cabling services, storage and backup systems, VoIP systems, and more. And we are experienced in the installation and maintenance of all equipment related to the network. Routers, switches, servers, POS devices, wireless devices, printers, broadband connectivity, digital signage, security/access control, energy management systems, CCTV, and more.

Above all, SageNet is driven by a total commitment to customer service in everything we do. We deliver custom network solutions and fully managed services to all sizes of organizations across a broad range of industries. From designing and installing a WAN for a convenience store chain to providing cabling installation at a new office building. From 24/7 network monitoring services for a hospital system to the implementation of a data storage and backup environment at a credit union.

Focus. Expertise. Commitment.

SageNet Solutions & Services

Network Solutions – Our network engineers and certified technicians design and implement highly efficient network solutions that minimize total cost of ownership, accelerate time-to-market, and create sustained competitive advantage.

- + Wide Area Networks
- + Local Area Networks
